

Private Sewer Inspection, Cleaning & Repair/Replace

The City of Roseville does not recommend any specific contractor. You can choose any contractor that offers these services, they do not need to be on this list. Contractors in Roseville need to be licensed by the City and pull a permit prior to performing any lining, replacement or repair. Since repair costs can be different, call a few contractors to compare prices. If you have questions about your private sewer line or need sewer records, please call Roseville Public Works at (651) 792-7004.

Key:

Televising means inspecting pipes with a video camera – before and after a repair.

Cleaning means removing clogs, roots, or buildup.

Lining means fixing pipes from the inside (no digging).

Replace means partial or full replacement of the pipe by digging.

An * after a contractor's name means they are minority owned, veteran owned, or a small business.
